LOVE Ecosystem — Institutional Whitepaper

Grassroots RWA tokenization and inverted economics: a structural response to capital exodus from legacy fund vehicles.

Legacy allocators charge a flat 2% management fee irrespective of allocator size. The LOVE inverted fee schedule reverses this: the smallest participants pay the least, and the largest, most disclosure-heavy mandates pay the most.

Liquidity is settled peer-to-peer on transparent rails. No ads. No user data tracking. Absolute transparency from the ground up.

Fee schedule:

Allocator tier	Fee	Notes
Retail	0.36%	Open access, no minimum
Professional	1.36%	Reporting suite included
Institutional	2.36%	Custody + audit trail
Sovereign	3.36%	Full disclosure mandate
